

Points Distribution by League Position (2023/24)

League ● La Liga ● Premier League

Competitive Balance - Mid-Table Compression

The Premier League's mid-table is 14 points tighter than La Liga's, reflecting a more competitive and less predictable league structure between positions 4-15

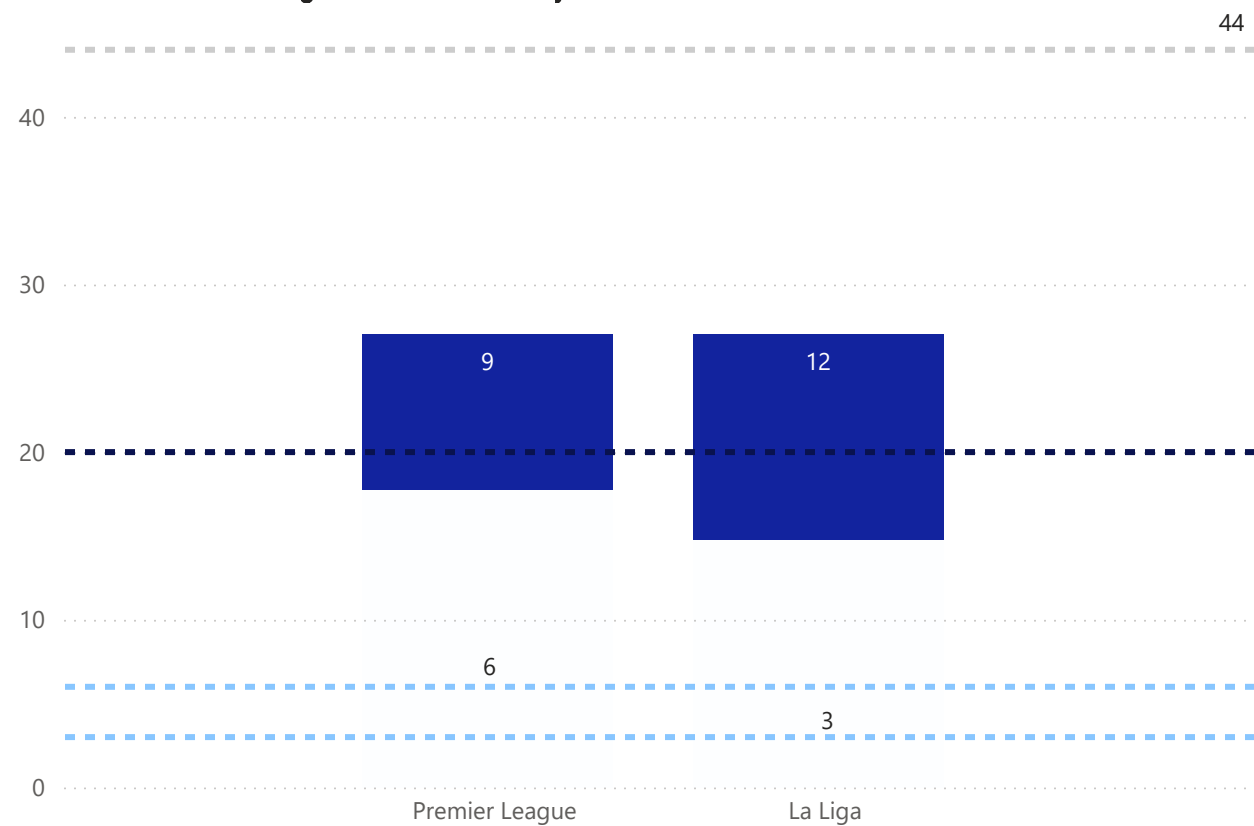

EPL Point Spread (4th-15th)

22

La Liga Point Spread (4th-15th)

League Resilience: Away Performance Distribution (2023/24)

Key Insight: While both leagues share the same performance ceiling (44 pts), the Premier League's "floor" is 100% higher than La Liga's (6 pts vs 3 pts). This indicated that bottom-tier EPL teams are significantly more resilient on the road.

Match Closeness vs. League Parity

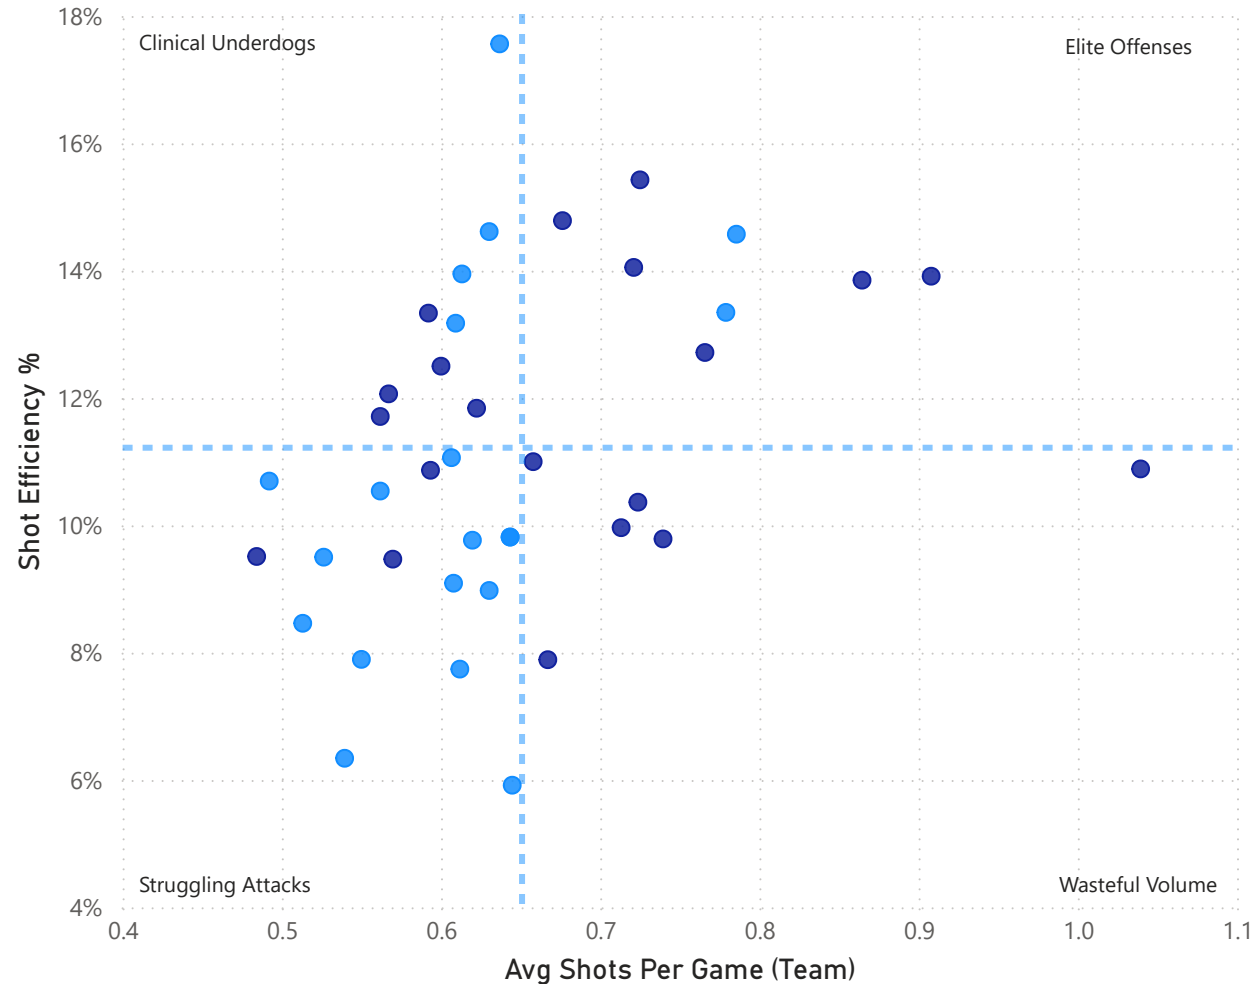

Match-level closeness does not guarantee season-level parity

La Liga Matches are closer on average, but points are more concentrated.
The Premier League distributes points more evenly across teams, sustaining season-long uncertainty.

Shot Volume vs Finishing Efficiency (2023/24)

League ● La Liga ● Premier League

Shot efficiency is broadly similar across leagues, suggesting EPL competitiveness is not driven by more clinical finishing.
